# Blank template for your own design.

Make sure when printing any of these templates that all page scaling is turned off so that the block dimensions are correct.

Side view. Draw design, cut it out and trace on the wood. Flip the block around and repeat on the opposite side. This is necessary as you will need to make sure you are making even cuts on both sides if you are using a coping saw to cut out the design.

Top or bottom view. Use this view if making any cuts out of the sides of the car. As in the above step, trace the outline on the top and bottom so that your cuts are even if using a coping saw.

Front view.

Back view.
